Senior PHP Software Engineer @ theiconic.com.au

About Us

THE ICONIC is Australia's new online destination for fashion and footwear. Launched in October 2011, THE ICONIC is offering a broad range of products from over 500 top brands from Australia and overseas.

Who We Are Looking For

We are looking for a talented Senior PHP Software Engineer who is experienced in other languages as JAVA and C++, strong work experience with agile modelling (Scrum or Kanban), familiar with Atlassian JIRA, Oracle Virtual Box, New Relix and Nginx and passion for high performance scalable design and database optimization.

Task and Duties

- Engage with our designers and managers to build kickass e-commerce platforms
- Implement new functionality and improve existing features based on business requirements
- Drive innovation by coming up with new and surprising ideas and provide constructive criticism

Ideal Candidate

- Extraordinary PHP 5 skills with 4 years experience
- Familiar with OOP PHP 5 and PHP MVC frameworks (eg. Zend, Symfony 2, Yii)
- Comfortable with cross-platform XHTML, CSS, JS and jQuery/ jQuery mobile
- Exposure to web services like REST and SOAP
- Skills in enterprise search engines like Solr, Lucene
- Experienced in coding large applications built on the LAMP stack
- Advanced knowledge about software architecture and best common practices
- Working knowledge in the e-commerce sector before
- Open for new challenges such as extreme programming

Our Offer

- With us, you will find an exciting blend of a vibrant start-up environment and professional operations in our office in the heart of Sydney.
- As a Senior PHP Software Engineer you play a significant role in enabling the development of our growing corporate portfolio.
- In flexible structures, flat hierarchies and with motivated colleagues there is a great potential for playing a key role.
